STARR FORUM

HUMAN RIGHTS & TECHNOLOGY

THURS, APRIL 14, 2016 | 4:30 PM - 6:00 PM

MIT Bldg 1-190 | 33 Massachusetts Avenue, Cambridge

- **Jay Aronson** is founding director of the Center for Human Rights Science at Carnegie Mellon University. He also is associate professor of science, technology, and society in the Department of History. He focuses on the interactions of science, technology, law, and human rights.
- **Christopher McNaboe**, from The Carter Center's Conflict Resolution Program, developed what is now the Syria Conflict Mapping project. He primarily works on Syria-related initiatives, but occasionally assists with other peace program activities.
- **Bradley Samuels** is a founding partner at SITU Research, a practice focused on developing and implementing new strategies for visualizing, mapping, modeling, and analyzing human rights violations for legal and advocacy contexts.
- **Sucharita Varanasi** is an attorney at Hinckely Allen & Snyder LLP. Prior to this post, she worked with Physicians for Human Rights as the senior program officer and MediCapt project manager for the program on Sexual Violence in Conflict Zones.
